01 PROFILE

Senior Security Engineer with **3+ years of hands-on experience** securing cloud-native and Kubernetes environments across **multi-cloud, hybrid, on-premise and private cloud** infrastructures. Specialising in end-to-end security architectures spanning **CNAPP, CSPM, CWPP, KSPM and AppSec**. Experienced in translating complex threat landscapes into actionable security programmes — from vulnerability identification and compliance alignment to incident response and DevSecOps pipeline integration.

02 PROFESSIONAL EXPERIENCE

SENIOR SECURITY ENGINEER

Mar 2023 — Present

AccuKnox

- Developed and executed a robust **security assessment program**, mitigating vulnerabilities in critical IT systems.
- Managed a **SIEM** system, providing real-time threat detection and incident response.
- Designed security controls for cloud environments ensuring adherence to **ISO 27001, CIS, NIST and SOC 2**.
- Built an **automated compliance assessment engine** that evaluates Linux and Windows VMs against **CIS benchmarks** and **STIGs** — reducing manual audit effort by **80% across 200+ assessed systems**.
- Utilised **CNAPP** solutions to manage multi-cloud and Kubernetes security posture for enterprise clients.
- Introduced and operationalised multiple compliance frameworks — **RBI Cyber Security Framework, SAMA CSF, SEBI CSCRF, DPDP, CIS and ISO 27001** — into the CSPM product, enabling automated compliance posture assessment across cloud environments.
- Coordinated continuous compliance and vulnerability management in container orchestration platforms.

APPSEC INTERN

Jan — Jun 2022

CyberXplore Pvt Ltd

- Performed **Web Application, Network and Android Penetration Testing**.
- Prepared detailed pentest reports of findings.

05 OPEN SOURCE ARSENAL

01 SANDMAN
github.com/th3-v3ng34nc3/sandman

Unified security scanning CLI wrapping Trivy, Opengrep, OWASP ZAP & ClamAV — image, secrets, SAST, DAST, IaC and malware. Linux, Windows, Docker & CI/CD.

02 SANDMAN WEB LIVE
sandman-web-seven.vercel.app

Web-based VAPT Reporter — streamlines creation, management & delivery of VAPT reports. Built with Next.js and TypeScript.

03 SANDMAN PT
github.com/th3-v3ng34nc3/sandman-pt

Automated VAPT orchestration framework — chains 15 tools into one pipeline, correlates findings and scores them with CVSS × EPSS.

04 SANDMANCER
github.com/th3-v3ng34nc3

Security assessment orchestration engine — chains recon, enumeration, exploitation & post-exploitation with risk-based prioritisation.

05 SANDMAN OSINT
github.com/th3-v3ng34nc3

Automated OSINT framework — aggregates public sources/APIs, maps digital footprints and produces structured intel reports.

06 SECURITY VEDA LIVE
th3-v3ng34nc3.github.io/SecurityVeda

Curated security knowledge platform — structured learning paths for cloud security, K8s hardening, DevSecOps & compliance.

07 SE TRAINING PLAN LIVE
th3-v3ng34nc3.github.io/SE-Training-Plan

Security Engineering training tracker — goal-setting, progress dashboards, certification roadmaps & skill matrices.

06 ACHIEVEMENTS

- Employee of the Month ×2 · Most Dedicated Employee (Quarterly)
- Introduced DPDP, RBI CSF, SAMA CSF, SEBI CSCRF, CIS & ISO 27001 mapping into the CSPM platform
- Automated compliance engine — 80% less manual audit effort across 200+ systems
- Centralised SIEM for faster detection & response
- Top 1% on TryHackMe
